

**Florida Public Hurricane Loss Model Version 6.2
Input Data File Format Specifications**

Commercial Residential Policies

Input files containing commercial residential policies to be processed through version 6.2 of the Florida Public Hurricane Loss Model should adhere to the format specifications contained in this document.

Observe the following when preparing the input file:

- (a) Provide one policy per line in a comma-separated values file (.csv). For a policy with multiple locations, each of the locations must be recorded in a separate line.
- (b) Do not use comma within the fields' values (e.g., as thousand separators or within addresses).
- (c) Include the name of each column in the first line of the file.
- (d) For fields that require a code, enter the code that more closely represents the data value.
- (e) Only include policies with wind coverage.

Each policy should contain a total of 40 attributes.

- 1. Policy ID** A unique identifier for this policy in the data file. An alphanumeric text.
- 2. Location ID** A unique identifier for the location of the covered building. An alphanumeric text.
